Monthly Report from the Town of Cheshire to the Department of Agriculture

August 29, 2025

1. CT Reg§ 22-336-17: Pens and Runs

Animals were placed in cages that did not meet the minimum size requirements while primary enclosures were cleaned.

- There were twenty animals impounded in August. The majority (19) came following the service of a search and seizure warrant at a Cook Hill address. The other impound for August was a dog that was returned to the owner same day.
- The eighteen cats and one dog were housed in multiple locations. They were placed in appropriately sized enclosures, and the enclosures were cleaned daily. The SACO was consulted prior to the animals being impounded, the day the animals were impounded we worked with two SACOs, and I requested a visit from the SACO mid-August.

2. CT Reg§ 22-336-33: Dog Pound Structure Requirements

- a. Chain link on multiple kennels was broken.
 - Work on the inside and outside fencing was underway. Poles are in, and fencing should be completed after walls/floors are finished; the work schedule has been on hold while the cats are impounded..
- b. Eight of the trough covers were not installed properly to allow the dogs access to the troughs and could potentially cause injury.
 - Trough covers that were fixed in November by DPW personnel remain fixed.
- c. Flooring surface coating is peeling and cracking and prevents is from being cleaned and sanitized properly.
 - Flooring work was scheduled for early August, the work schedule has been on hold while there are cats impounded.

3. CT Reg§ 22-336-37: Animal Health

Food was stored inappropriately (including an open bag of prescription food sitting on the wet floor).

- Unopened food remains stored on metal shelving racks off the floor. Any open food is contained in heavy duty plastic bins. This is routinely checked via LT Miller's daily checklist. The metal shelving has been moved out of the kennel closet to accommodate work, but food is still stored off the ground on the shelving unit.

4. CT Reg § 22-336-38: Sanitation

Evidence of a mice infestation throughout the facility.

- The attached August 13 email from David Brodeur (exterminator) states, "Just updating you on today's service. I found no rodent activity on interior and exterior of the building."

5. CT Reg § 22-336-40: Quarantined Animals; Isolation Areas

Lacked a properly set up isolation area.

- The kennel area is currently under renovation and will be closed until completed. Animals taken in by the Cheshire MACO's will be taken to Southington Animal Control. Work will resume as cats are adopted out.
- One cat needed to be isolated due to an upper resp. infection. It was housed in a crate in the office, away from the other cats.

6. Animal Welfare Violations Under CGS § 53-247

- a. Failing to groom animals as needed for health reasons.
 - b. Failure to provide necessary veterinary care.
 - c. Failure to protect animals from becoming wet or exposed to chemicals while enclosures were being cleaned and disinfected.
 - d. Resting surfaces were not dried before allowing animals to use them.
 - e. Failure to arrange proper holding of wildlife that needed to be transferred to a wildlife rehabilitation facility.
- The pit bull dog that had been impounded (Southington) in July remains impounded there. Weekly wellness checks were done, and he was sent to Cheshire Animal Hospital for a thirty day exam on 8/22.
 - All of the impounded cats and dog from the 8/1 incident have received ongoing weekly wellness checks, and have gone to the vet as needed. Multiple cats (that had been surrendered to us) have gone in for spay/neutering, and all have received vaccinations.
 - All animals are placed in appropriately sized enclosures, enclosures are cleaned and dried daily, food, water, litter and bedding are changed daily.

Items 1, 2a-2c, and 5 remain uncorrected, necessitating ongoing monitoring to ensure full compliance with applicable health and safety requirements.

1. Management and Oversight:

- a. The Respondent is to establish a management team to oversee, review and audit the operation of the animal control facility, this shall include a designated facility supervisor.
 - The management team shall consist of the (Acting) Chief of Police or the Deputy Chief of Police, and the Support Services Commander.
- b. The management team shall be responsible for the preparation and completion of any forms required by statutes, regulations and this Consent Order.
- c. Supervisor will verify daily operations via checklist and ensure that the following facility and operational conditions are met:
 - i) Animals will be removed from enclosures before cleaning.
 - ii) When animals are removed for cleaning, they must be placed in an enclosure that is appropriately sized,
 - iii) The cleaning process is to be done in a timely manner.
 - iv) Bedding is changed when soiled or wet.
 - v) Enclosures must be fully dried before returning the animals.
 - vi) Grooming and bathing will be done as necessary.
 - vii) ACO will provide the supervisor with a weekly wellness assessment of all animals with photographs.
 - Daily inspections have continued, checklists will be among the attachments. Weekly wellness assessments have been done for any animals here long enough to necessitate it.
 - I have utilized several logs to keep track of animals as there are multiple animals in multiple locations, and the situation is ever evolving. I have attached the logs showing the locations and final outcomes for the animals.

2. Training:

- a. The Respondent will provide documented training, such as National Animal Care and Control Association (NACA) ACO I Training and Certification, to all staff and volunteers who have direct contact with any animals in the Town's care, control or custody.
 - LT Miller, ACO Leiler and ACO Medlyn have all completed this training.
- b. The training needs to include proper animal welfare and facility operations procedures. It should be at least 25 hours and happen within 45 days of the execution of this Consent Order.
 - Completed for all.
- c. This training will be conducted at the Town's expense.
 - The Town paid for the class.
- d. Course syllabus shall be subject to the Commissioner's approval.
 - Previously approved by Chief Baker.

3. Animal Care:

- a. Create an animal intake report as required by CT Reg § 22-336-41 and include photo documentation of animals. All animals impounded should have an intake

- report and records shall be maintained till this order is lifted.
- b. Perform medical assessment upon intake to determine if veterinary care is necessary and provide care.
 - c. Animals kept longer than 30 days shall have a wellness exam performed by a veterinarian and documentation should be retained until this order is lifted.
 - d. A veterinarian shall examine any animal that requires veterinary care in a timely manner, and Respondent shall implement all recommendations for care.
- Impound forms and weekly assessment forms have been implemented and have been used as is necessary. We have also been utilizing the Nexgen system upon intake, and dogs are assigned an identifying number in the system. Photos are taken upon intake, and during wellness assessments.
 - I have altered the dog adoption form to include information pertaining to cats. This new form will be use going forward and will be uploaded to the Town's webpage soon. (attached)

"I have personally examined and am familiar with the information submitted in this document and all attachments thereto, and I certify, based on reasonable investigation, including my inquiry of those individuals responsible for obtaining the information, that the submitted information is true, accurate and complete to the best of my knowledge and belief. I understand that any false statement made in the submitted information may be punishable as a criminal offense under §53a-157b of the Connecticut General Statutes and any other applicable law."

ADOPTION APPLICATION

CATS, Socialized:

Socialized cats are generally comfortable around people and adapt well to home environments. Use the following information to prepare your home and establish routines before bringing your new cat home.

Prepare your home:

- For the first few days, set up a safe room, bed, litter box, food, water, and toys all in one quiet room to help the cat acclimate.
- Place litter boxes in quiet, but accessible areas. One per cat plus one extra.
- Save your furniture, provide scratching posts in several areas.
- Create vertical spaces, perches for your new cat.
- Kitty proof the home; remove toxic plants, loose cords, and check for screens in windows.

Food and Water:

- Keep your cat's food and water dishes in a quiet, consistent location.
- Provide fresh water daily in a clean dish, preferably ceramic or stainless steel dish, or a filtered fountain.
- Follow vet recommendations for appropriate food choices, wet/dry.

Veterinary needs:

- Get a vet visit early, within 72 hours of adopting your cat.
- Microchip/updated information for a microchip with your contact information.
- Get your cat spayed or neutered, verify with MACO.
- Keep up on vaccination, medications, flea/tick preventatives.

Prepare your family:

- Make sure everyone in the family is on the same page with...
 - Proper handling techniques.
 - Plans for introductions to other pets.
 - Daily routines.
 - Backup caretakers.

Enrichment and bonding:

- Dedicate daily playtime with your cat, use toys, wands, puzzle feeders, etc.
- Prepare some cozy and private resting places for your cat.
- Groom regularly to build trust, brushing, nail trimming.

ADOPTION APPLICATION

CATS, Unsocialized:

Unsocialized or shy cats may take weeks or even months to trust humans. They need patience, quiet, and consistent routines to feel safe. Use the following information to prepare your home and establish routines before bringing your new cat home.

Prepare your home:

For the first few weeks, set up a dedicated quiet room, bed, litter box, food, water, and hiding spots.

- Provide safe hiding areas; covered beds, boxes, cat trees with cubbies.
- Keep it calm...limit loud noises, visitors, and sudden changes.
- Secure windows, doors, and vents to ensure no dangerous escape routes.
- Provide vertical spaces, perches for your new cat to observe from a distance.

Food and Water:

- Providing consistent feeding times helps establish routines and trust.
- Use food and treats as positive reinforcement, don't force interactions.
- Make sure fresh water is always available in a stable, quiet location.

Veterinary Needs:

- Get a vet visit early, within 72 hours of adoption.
- Keep up on vaccinations, medications, flea/tick preventatives.
- Get your cat spayed or neutered, verify with MACO.
- Discuss anxiety or behavior concerns with your vet, or a feline behaviorist as needed.

Prepare your family:

- Supervise kids at all time around the cat.
- Make sure all members of the family know this is a process and will take time.
- Introduce other pets gradually, using scents; this may take time.
- Don't force it! Keep handling at a minimum, allow the cat to approach on its terms.

Enrichment and Bonding:

- Provide consistency and routines in feeding, play, and quiet times.
- Spend quiet time in the cat's room to build familiarity.
- Use positive reinforcement, you are taking small steps toward progress.
- Offer interactive play with cat toys and puzzles at the cat's comfort level.

ADOPTION APPLICATION

CATS, Feral or Barn Cats:

Feral or barn cats have an aversion to humans, they are not just shy; they have lived outside in feral colonies. Can be good to live in outdoor shelters with some accommodations.

If you are interested in adopting a barn cat, you should be willing to provide a minimum of the following accommodations.

Shelter:

- Weatherproof, insulated area (even as part of a larger barn, garage, warehouse, etc)
- Warm bedding for cold weather; shade and ventilation for hot weather.
- Safety from predators.

Food and Water:

- Consistent feeding will keep them around.
- Daily food and fresh water (heated bowls in the winter) are important.
- Dry kibble is good, you can add wet food also.

Veterinary Needs:

- Core Vaccinations.
- Spay and neuter to prevent unwanted litters and other problems (fighting).
- Parasite control, fleas, ticks, mites, deworming.

Safety and Comfort:

- Make it safe, secure machinery and tools so the cat(s) don't get trapped or injured.
- Avoid toxic substances like antifreeze, rodent poisons, etc.
- Provide areas to perch, stress reliever and allows the cat to watch for rodents.

Social:

- Routines can help make them more comfortable; stop in to feed at the same time and at the same place and do a daily visual check of the cats at this time.
- Though you visit daily to check on them, you need to understand that these cats are not and will not be suited for indoors/lap cats.

Introductions:

- Help them learn that this is home by keeping them confined to a large kennel for the first few weeks. Provide bedding, litter, food and water during this time.
- After releasing to the larger space, keep the confinement space open for access and keep food and water there.

If you agree to provide the level of care listed above,
